

Automatic Updates Installation

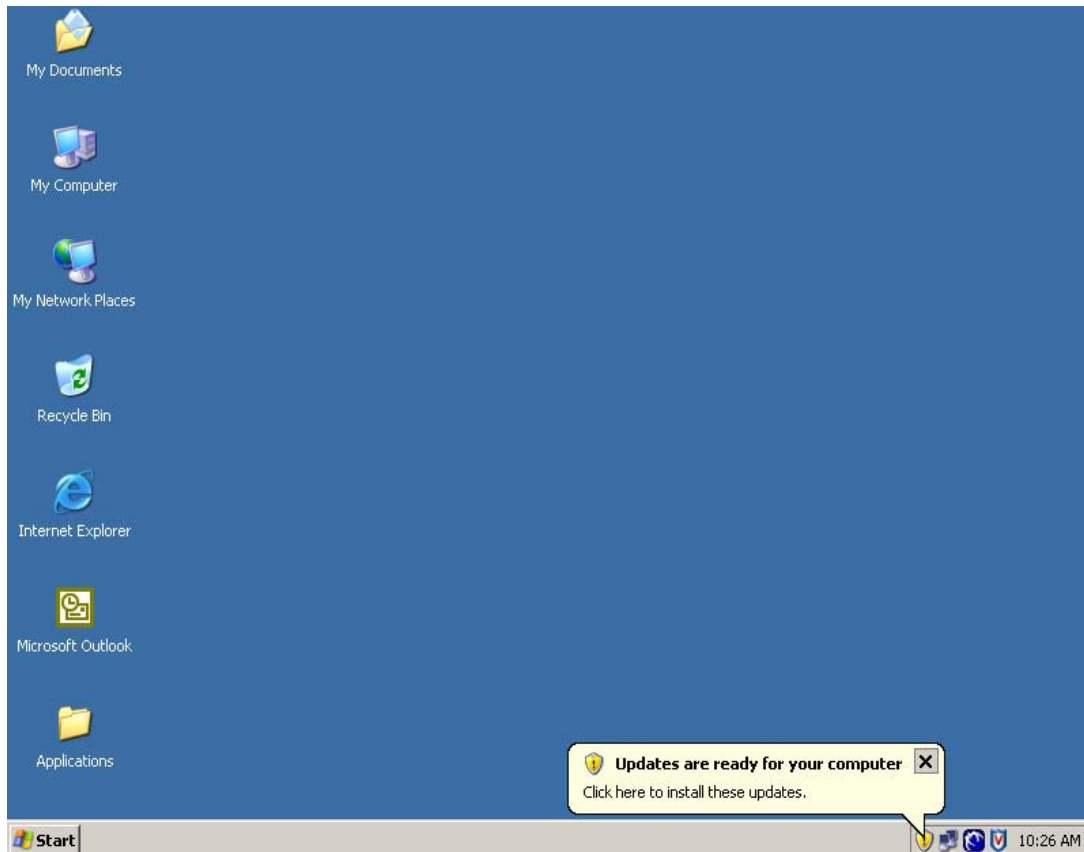

1. When the **Automatic Updates** notification appears on the screen as shown below, no action is necessary. The computer has already performed the required reboot.

Automatic Updates Installation

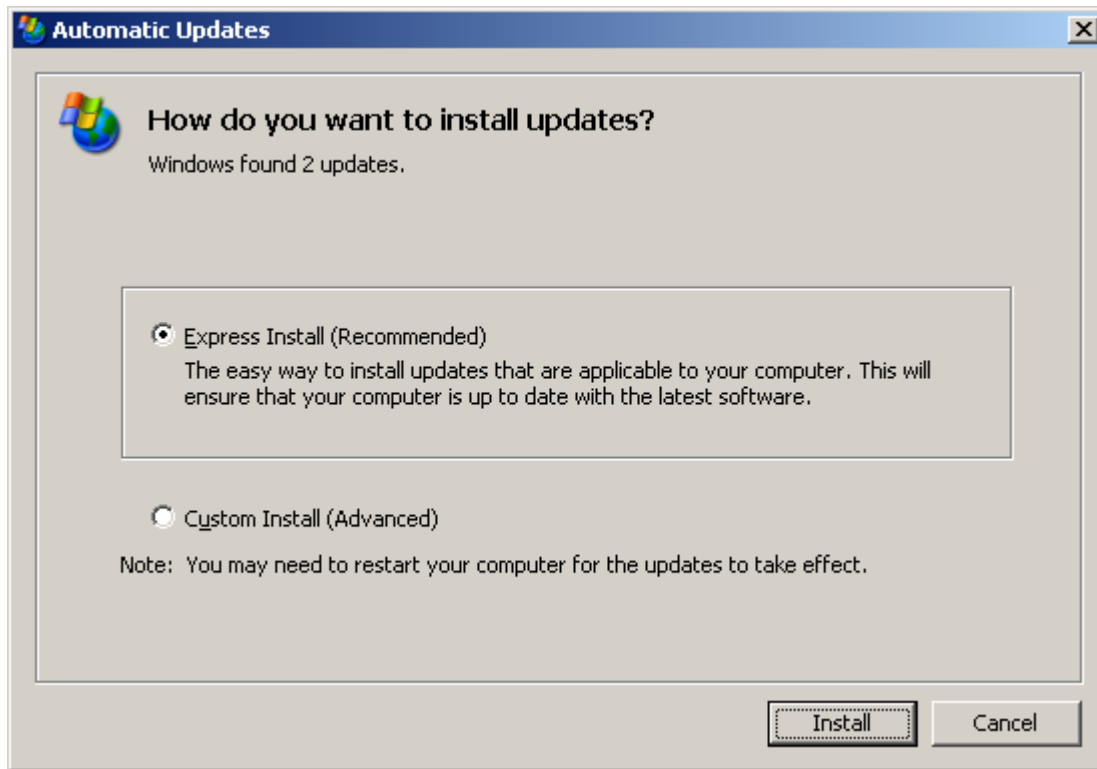

To install Automatic Updates

1. When the **Automatic Updates** notification appears on the screen as shown below, click the **Updates are ready for your computer** message.

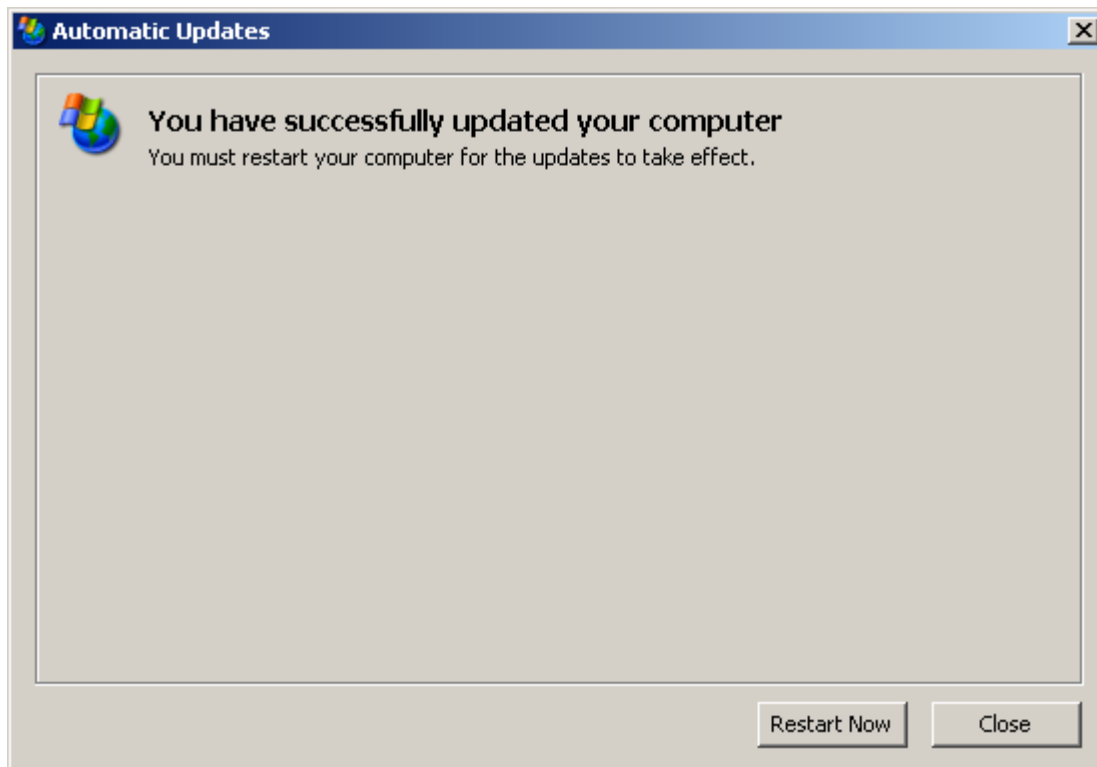

2. From the **Automatic Updates** dialog box, the **Express Install (Recommended)** radio button is selected by default.

Automatic Updates Installation

3. Click the **Install** button to start the download process.

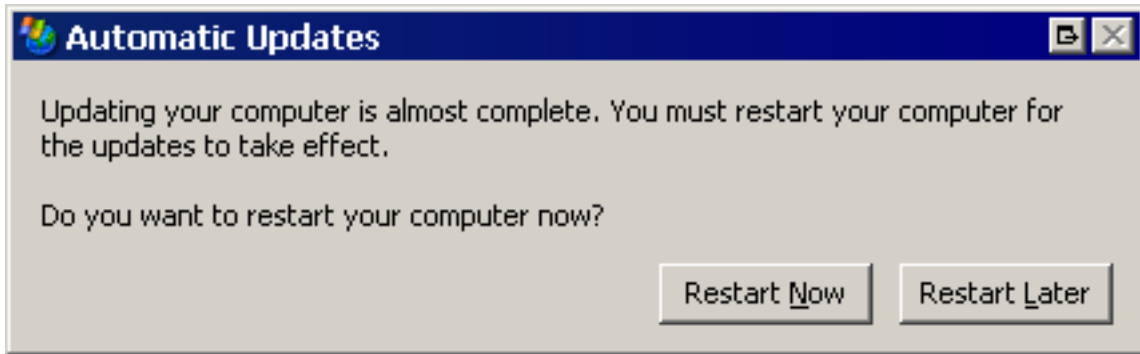

4. Click the **Restart Now** button to restart the computer.

Note: If you click the **Close** button the **Automatic Updates** dialog box will close.

Automatic Updates Installation

An **Automatic Updates** dialog box will appear as a reminder to restart the computer. This message will appear every 30 minutes until the computer has been rebooted.

If you have problems with the Automatic Updates Installation, please call the IT Service Center at (248) 858-8812.
