

BENCH TO BEDSIDE

Moving medical devices and technology from concept to clinical applications that came about as a result of the pandemic and related challenges.

APR **28** 2021
3-4 PM

Moderator:

Jaideep (Jai) Rajput, *Director of Commercialization at Beaumont Health*

Panelists:

- Therese Jamison, *Director of Nursing at LTU*
- Brianna (Brie) Riley, *Manager at Henry Ford Innovations*
- Fred Molnar, *Vice President of Entrepreneurship and Innovation at MEDC*

You will hear discussions on topics such as:

- What hospitals and health networks are doing to engage with companies
- How a startup can get the most out of conducting pilot studies with a health care system partner
- How early stage companies can work with health care systems to generate user experience for their new technologies
- How and why health care organizations should share their technical expertise

At the LTU Science & Technology Showcase, you can view the students' research poster session projects to learn about their work in biomedical engineering (BME), nursing, molecular and cell biology, and other life science disciplines. LTU's curriculum combines scholarship, research, and real-world applications. You never know where the next great idea or talent will come from.
