AGENDA

8:30 a.m. Badge Pickup and Continental Breakfast

9:00 Welcome and Introductions

9:15 **Track One: Overview of Geographic Information Services (GIS) products and services available to communities through Oakland County's IT Department**
You will learn about GIS and how to access free spatial data and applications that are available to your community. Hear how the county's IT department can assist communities during office hours with GIS services and training.

10:00 **Track Two: Applying GIS technology to support community planning initiatives**
Hear why mobile data collection is important. See demonstrations of mobile data collection applications and what can be done with that data once it's collected. Learn how the county can assist communities in implementing common solutions (e.g., sidewalk, tree, community feature inventories, etc.) by using ArcGIS Online.

11:00 **Track Three: Applying GIS technology to support economic development**
See a demonstration of the Development Planning Explorer application implemented by Independence Township. Learn how Oakland County's Department of Economic Development & Community Affairs can assist communities with market research.

Noon Close

Information Will Benefit:

- Elected and Appointed Officials
- City Managers
- Planners
- GIS Users
