March 9, 2020

Dear Oakland County educational leader,

Oakland County Health Division (OCHD) is working closely with Oakland Schools, healthcare providers, Michigan Department of Health and Human Services (MDHHS), and Centers for Disease Control and Prevention (CDC) to actively monitor and prepare for the presence of coronavirus (COVID-19) in the community. OCHD is providing this toolkit to share information with you, your employees and families about how to stay healthy and prevent illness.

CDC has created Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19). This guidance provides recommendations to prevent exposure to respiratory illnesses and planning considerations if there are more widespread, community outbreaks of COVID-19. Some recommended strategies for childcare providers to use now include:

- Report influenza-like activity via the Oakland County’s Health & Human Services Communication Portal
- Educate students, parents, and staff regarding preventative hygiene practices
- Ensure students and staff who become sick at school/childcare or arrive sick are sent home as soon as possible
- Separate sick students and staff from others until they can go home
- Routinely disinfect frequently touched surfaces (e.g., toys, doorknobs, tables, countertops)
- Provide staff disposable disinfectant wipes so commonly used surfaces can be wiped down before and after use

The best way to prevent infection is to avoid being exposed to the virus. The simple everyday actions you can take to help prevent the spread of flu and other common illnesses can also help prevent the spread of coronaviruses. The following documents are attached and can also be found on our website. Please feel free to share them:

- Coronavirus Disease 2019 (COVID-19) – What You Need to Know
- Stop the Spread of Germs
- Hand Washing Instructions
- Social Media Posts
- A Clean School is a Healthier School
- Cover Your Cough

This is an evolving situation and information/resources will be updated as available at www.oakgov.com/health. Our Nurse on Call is also available at 800-848-5533, Monday through Friday, 8:30 a.m. – 5:00 p.m. or noc@oakgov.com.

Sincerely,

OAKLAND COUNTY HEALTH DIVISION
Department of Health and Human Services

Leigh-Anne Stafford, M.S.A.
Health Officer
Coronavirus Disease 2019 (COVID-19)

What You Need to Know

What is Coronavirus Disease 2019 (COVID-19)?

Coronavirus Disease 2019, or COVID-19, is the disease caused by a new respiratory virus named SARS-CoV-2. COVID-19 was first identified in Wuhan, Hubei Province, China in December 2019.

What are the symptoms of COVID-19?

People diagnosed with COVID-19 have reported mild to severe respiratory illness 2 to 14 days after exposure. Symptoms include:

- fever
- cough
- shortness of breath

How is COVID-19 spread?

The virus is thought to spread mainly from person to person

- Between people who are in close contact with one another (within about 6 feet).
- Through respiratory droplets produced when an infected person coughs or sneezes. These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.
- It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose or possibly their eyes.

Has anyone in the United States gotten infected?

Am I at risk for COVID-19 infection?

This is a rapidly evolving situation and the risk assessment may change daily. The latest updates are available on CDC’s Coronavirus Disease 2019 (COVID-19) website.

Some people that may be at higher risk of getting very sick from this illness includes:

- Older adults
- People who have serious chronic medical conditions
  - Heart disease
  - Diabetes
  - Lung disease
Can I still travel to countries where COVID-19 cases have occurred?

For the most up to date information related to Coronavirus Disease 2019 Travel check out CDC’s travel page at https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html.

What should I do if I recently traveled from an area with ongoing spread of COVID-19?

If you have traveled from an affected area (https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html), there may be restrictions on your movements for up to 2 weeks. If you develop symptoms during that period (fever, cough, trouble breathing), seek medical advice. Call the office of your health care provider before you go, and tell them about your travel and your symptoms. They will give you instructions on how to get care without exposing other people to your illness. While sick, avoid contact with people, don’t go out and delay any travel to reduce the possibility of spreading illness to others.

Is there a vaccine or treatments?

There is not a vaccine or specific treatment recommended for COVID-19. People with COVID-19 can seek medical care to help relieve symptoms.

How can I help protect myself and others?

The best way to prevent infection is to avoid being exposed to the virus. The simple everyday actions you can take to help prevent the spread of flu and other illnesses can help prevent the spread of coronaviruses. These include:

- Stay home when sick.
- Washing your hands often with soap and warm water for 20 seconds, and help young children do the same. If soap and water are not available, use an alcohol-based hand sanitizer with at least 60% alcohol.
- Covering your nose and mouth with a tissue when you cough or sneeze, or cough/sneeze in your upper sleeve. Immediately throw away used tissues in the trash, then wash hands.
- Avoiding touching your eyes, nose, and mouth with unwashed hands.
- Avoiding close contact, sharing cups, or sharing eating utensils.
- Cleaning and disinfecting frequently touched surfaces, such as toys and doorknobs.
- Practice good health habits. Get plenty of sleep, be physically active, manage your stress, drink plenty of fluids, and eat nutritious food.
- Be prepared with the following supplies:
  - Maintain a two-week supply of water and food at home
  - Routinely check your regular prescription drugs to ensure that you won’t run out
  - Keep non-prescription drugs and other health supplies on hand
  - Get copies and maintain electronic versions of health records
  - Talk with family members about how they would be cared for if they got sick and what would be needed to care for them in your home
- CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory illnesses, including COVID-19.
Hand washing

What you need to know

Hand washing steps

1. Rub your hands together for at least 20 seconds using warm running water and soap.
2. Wash under fingernails, between fingers, back of hands and wrists.
3. Rinse your hands well under warm running water.
4. Dry your hands completely. In the home, change hand washing towels often.

In Public Bathrooms

- Dry your hands with a single-use paper towel (or with hot air blow dryer).
- If towel dispenser has a handle, be sure to roll the paper down before you wash your hands. This helps to ensure that you will not pick up new germs from the handle.
- For hand-held faucets, turn off water using a paper towel instead of bare hands so you will not pick up new germs on your clean hands.
- Open the bathroom door with the same paper towel.

Always practice healthy habits

- Cover your mouth and nose with a tissue when sneezing or coughing, or cough/sneeze into your upper sleeve. Immediately throw away used tissues, then wash hands.
- Teach and show children how to wash hands correctly.

When to wash hands

Wash hands after:
- Coughing, sneezing, or touching objects and surfaces. You can also use hand sanitizer with at least 60% alcohol
- Using the bathroom or helping a child use the bathroom
- Changing a diaper; wash the child’s hands too
- Handling items soiled with body fluids or wastes such as blood, drool, urine, stool, or discharge from nose or eyes
- Arriving home from day care, friend’s home, outing, or school
- Cleaning up messes
- Handling a sick child
- Touching an animal or pet

Wash hands before:
- Preparing or serving food
- Eating or drinking

The most important thing you can do to prevent the spread of illness is wash your hands often.

Washing hands is more effective than hand sanitizer.
HELP PREVENT THE SPREAD OF RESPIRATORY DISEASES

- Wash your hands often with soap and warm water for at least 20 seconds.
- Clean and disinfect frequently touched objects and surfaces.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Cough and sneeze into your upper sleeve or cover your cough or sneeze with a tissue, then throw in the trash. Wash hands.
- Stay home when you are sick, except to get medical care. Call ahead before you visit your doctor or emergency room.
- Avoid contact with people who are sick.

- Office Equipment
- Elevator Buttons

A CLEAN WORK ENVIRONMENT IS A HEALTHIER WORK ENVIRONMENT

The Oakland County Health Division will not deny participation in its programs based on race, sex, religion, national origin, age or disability. State and federal eligibility requirements apply for certain programs.
CLEANING AND DISINFECTING HARD SURFACES

What You Need to Know

What should be used to clean and disinfect hard surfaces?

When a surface is visibly dirty, wash with a general household cleaner (soap or detergent). Rinse with water and follow with a disinfectant. When a surface is not visibly dirty, clean with a commercial product that is both a detergent (cleans) and a disinfectant (kills germs). Wear disposable gloves. Make sure the disinfectant product you choose is registered with the United States Environmental Protection Agency (EPA) and includes an EPA registration number on it. For a list of EPA-registered disinfectants visit: www.epa.gov/oppad001/chemregindex.html.

NOTE:

• Minimum disinfectant concentrations are needed for different bacteria/viruses and surfaces. In general, a bleach concentration of 200 parts per million (1 tablespoon of bleach in one gallon of water) is effective against many bacteria and viruses. Bleach solution of 1,000 – 5,000 parts per million (1/3 cup to 1 2/3 cups of bleach in 1 gallon of water) may be needed to be effective against Norovirus. For more detailed information visit the EPA disinfectant web page at: www.epa.gov/oppad001/chemregindex.html.
• When using chlorine bleach to disinfect surfaces, use an unopened bottle. Chlorine bleach loses its effectiveness 30 days after opening. A fresh bleach/water solution should be made daily. Spray or use a cloth to apply to surfaces and let stand for 10 minutes if possible. Rinse with clear water.
• Always follow label instructions carefully when using cleaners and disinfectants. Pay attention to hazard warnings and label instructions for using personal protective items such as household gloves.
• DO NOT MIX DISINFECTANTS AND CLEANERS

What surfaces should be cleaned and disinfected?

Hard surfaces that are touched often or by more than one person need to be cleaned and disinfected as explained above. Examples of hard surfaces include:

• Countertops
• Toys
• Bathroom surfaces
• Tabletops
• Desktops
• Drinking fountains
• Doorknobs/door handles
• Chairs

Use sanitizer cloths on electronic items that are touched often. These items include computers, keyboards, computer mice, telephones, remote controls, light switches, door knobs and hand-held video games. Also use sanitizer cloths on car door handles, steering wheels, and gear shifts in vehicles.
The Oakland County Health Division will not deny participation in its programs based on race, sex, religion, national origin, age or disability. State and federal eligibility requirements apply for certain programs.

STOP THE SPREAD OF GERMS

COVER YOUR COUGH

Cover your mouth and nose with a tissue when you cough or sneeze

OR

cough or sneeze into your upper sleeve, not your hands

Throw away used tissue

WASH YOUR HANDS AFTER COUGHING OR SNEEZING

Washing hands with soap and warm running water is most effective

Or use alcohol-based hand sanitizer when soap and water not available

WASH YOUR HANDS AFTER COUGHING OR SNEEZING
Dear Families,

The District Name is monitoring the situation regarding the Coronavirus Disease 2019 (COVID-19). We are in close communication with the Oakland County Health Division (OCHD) and will continue to follow their guidance and recommendations regarding the COVID-19 outbreak. At this time, COVID-19 is a rapidly evolving situation and risk could change. The best way to prevent infection is to avoid being exposed to the virus.

We are deeply committed to the health and safety of our students and staff. Schools in School District are taking extra precautions in disinfecting our buildings. Our maintenance and operations staff are taking extra care in cleaning surfaces, such as desks and doorknobs. Our restrooms are cleaned daily in all buildings.

Simple everyday actions you can take to help prevent the spread of flu and other common illnesses can also help prevent the spread of coronaviruses. We want to remind families that the best ways to prevent the spread of COVID-19 are the same as preventing the cold and flu, and include:

- Wash your hands frequently with soap and water for 20 seconds.
- Cover your mouth when you sneeze or cough with a tissue or sneeze into your arm.
- Avoid touching your eyes, nose, and mouth.
- Clean and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.
- Avoid close contact with people who are sick.
- Stay home when you are sick and keep kids home for at least 24 hours after illness.

The safety, health, and well-being of our students, staff and school community will, as always, continue to be our priority. We will continue monitoring the development of COVID-19 and plan accordingly in partnership with local, state, and federal health and government officials.

If you would like to learn more about COVID-19, please visit oakgov.com/health, michigan.gov/coronavirus, or cdc.gov/coronavirus.

If you have any questions or concerns, please do not hesitate to call your healthcare provider or reach out to Oakland County Nurse on Call at 1-800-848-5533, from 8:30 AM- 5:00 PM, Monday-Friday.

Sincerely,

Name

OAKLAND COUNTY HEALTH DIVISION

The following diseases or conditions are required to be reported as part of your weekly aggregate counts through the Oakland County Health and Human Services Portal (HHSCP).

- Flu-like illness
- Stomach virus
- Unspecified Illness

PLEASE NOTE: HAND, FOOT AND MOUTH DISEASE, CONJUNCTIVITIS (PINK EYE), IMPETIGO, MONO, PEDICULOSIS (HEAD LICE), RINGWORM AND SCABIES ONLY NEED TO BE REPORTED IF THERE ARE TWO (2) OR MORE CASES IN ONE WEEK.

If you have any questions about the diseases listed above or other communicable diseases not listed, please call 248-858-1286.
The following chart contains information and public health recommendations for various communicable diseases in schools and other group activity settings. Diagnosis should always be made by a physician. Exclusion period given is a minimum amount of time and applies to uncomplicated cases of the diseases listed.

Note: Please notify the Health Division immediately at 248-858-1286 or 1-888-350-0900 ext. 81286, if you are aware of an unusual occurrence of a disease or an unusual number of cases of one type of disease on a given day.

<table>
<thead>
<tr>
<th>DISEASE</th>
<th>INCUBATION PERIOD</th>
<th>PERIOD OF COMMUNICABILITY</th>
<th>ACTIONS TO BE TAKEN AND/OR EXCLUSION PERIOD</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHICKENPOX</td>
<td>Range 10-21 days; commonly 14-16 days.</td>
<td>As long as 5 days, but usually 1-2 days before onset of rash and until all lesions have crusted.</td>
<td>Exclude until all lesions have dried or crusted, usually 5-6 days after the eruption of the first crop of lesions (with or without Zovirax therapy).</td>
</tr>
<tr>
<td>CONJUNCTIVITIS (Pink Eye)*</td>
<td>Variable depending on infecting agent, sometimes within 24 hours.</td>
<td>During course of active infection.</td>
<td>Exclude until under medical care and drainage from eyes has cleared.</td>
</tr>
<tr>
<td>FIFTH DISEASE (Hungarian Measles)</td>
<td>Variable about 4-20 days.</td>
<td>Prior to onset of rash.</td>
<td>Exclude while fever is present.</td>
</tr>
<tr>
<td>HAND, FOOT &amp; MOUTH DISEASE*</td>
<td>Usually 3-5 days.</td>
<td>2-3 days prior to symptoms and while sores are present, about 7-10 days. Can be found in feces for several weeks during acute stage.</td>
<td>Exclude until no new sores appear and other symptoms (fever, sore throat, drooling) are gone.</td>
</tr>
<tr>
<td>HEPATITIS, TYPE A</td>
<td>Range 15-50 days. Average 28-30 days.</td>
<td>2 weeks before onset of symptoms to a maximum of 1 week after onset.</td>
<td>Exclude from food handling and direct patient care until 7 days after onset. Day care exclusion varies.</td>
</tr>
<tr>
<td>HEPATITIS, TYPE B</td>
<td>Range 45 days-6 months; average is 60-90 days (2-3 months).</td>
<td>Several weeks before onset of symptoms until blood no longer positive for evidence of virus.</td>
<td>No exclusion except for open sores that cannot be contained or if child is biting people.</td>
</tr>
<tr>
<td>HEPATITIS, TYPE C</td>
<td>Range 2 weeks to 6 months; commonly 6-9 weeks.</td>
<td>1 or more weeks before onset through acute clinical course.</td>
<td>Only if uncontainable open sores present or if child is biting people.</td>
</tr>
<tr>
<td>HERPES SIMPLEX, TYPE I &amp; II</td>
<td>Range 2-12 days.</td>
<td>Usually as long as lesions are present. Has been found in saliva for as long as 7 weeks after mouth lesions.</td>
<td>No exclusion recommended unless child cannot control drooling.</td>
</tr>
<tr>
<td>IMPETIGO*</td>
<td>Variable, indefinite; commonly 4-10 days.</td>
<td>While sores are draining. After 24-48 hours of antibiotic treatment the person is no longer contagious.</td>
<td>Exclude until 24 hours after treatment has started, lesions healing and no new lesions appear.</td>
</tr>
<tr>
<td>INFLUENZA/INF. LIKE ILLNESS</td>
<td>Usually 1-3 days.</td>
<td>From 1 day before up to 5-7 days after onset.</td>
<td>Exclude until 24 hours after fever has resolved.</td>
</tr>
<tr>
<td>MEASLES (Rubeola/Hard Measles)</td>
<td>Range 7-21 days; 10-12 days average.</td>
<td>Usually 4 days before to 4 days after onset of rash.</td>
<td>Exclude until 4 days after onset of rash.</td>
</tr>
<tr>
<td>MENINGITIS (Meningococcal, Haemophilus influenzae)</td>
<td>Variable, depends on type of bacteria. Range 2-10 days Commonly 2-4 days.</td>
<td>As long as organisms are present.</td>
<td>Exclude until under treatment and physician approves return.</td>
</tr>
<tr>
<td>MONONUCLEOSIS*</td>
<td>Range 4-6 weeks.</td>
<td>Prolonged communicability may persist up to a year or more.</td>
<td>Exclude until under medical care and physician approves return.</td>
</tr>
</tbody>
</table>

* PLEASE NOTE: HAND, FOOT AND MOUTH DISEASE, CONJUNCTIVITIS (PINK EYE), IMPETIGO, MONO, PEDICULOSIS (HEAD LICE), RING WORM AND SCABIES NO LONGER NEED TO BE REPORTED UNLESS THERE ARE TWO (2) OR MORE CASES IN A WEEK.

CD Ref Chart 03/04/2020 l:\Health\Medical\EPI\Clerical Files\School\Reporting Packet 2020-2021\CD Ref Chart 2020.docx. Reviewed for 2019/2020 school year.

<tr>
<td>MUMPS</td>
<td>Ranges 14-25 days; commonly 16-18 days.</td>
<td>Greatest 3 days before to 5 days after onset of illness.</td>
<td>Exclude until 5 days after onset of swelling.</td>
</tr>
<tr>
<td>MRSA (Staphlococcus aureus, methicillin resistant)</td>
<td>Variable</td>
<td>As long as lesions are open or draining.</td>
<td>No exclusion is recommended from attending school or sports if lesion is kept covered and contained and good personal hygiene is maintained.</td>
</tr>
<tr>
<td>PEDICULOSIS (Head Lice)*</td>
<td>Eggs hatch in 7-10 days.</td>
<td>Until lice and viable eggs are destroyed.</td>
<td>Exclude at end of day and until 1st treatment and exam for live lice/eggs completed. A 2nd treatment may be necessary 7-10 days after 1st treatment.</td>
</tr>
<tr>
<td>PERTUSSIS (Whooping Cough)</td>
<td>Range 5-21 days. Average 7-10 days.</td>
<td>After onset of cold-like symptoms (first 2 weeks) until 5 days after start of treatment with the appropriate antibiotic.</td>
<td>Exclude until 3 weeks from onset of disease if untreated, or until 5 days after antibiotic treatment started.</td>
</tr>
<tr>
<td>PINWORMS (Enterobiasis)</td>
<td>Range 2-6 weeks.</td>
<td>As long as eggs are laid.</td>
<td>Exclude until first treatment completed.</td>
</tr>
<tr>
<td>RASH, UNDIAGNOSED, WITH OR WITHOUT FEVER</td>
<td>Variable depending on agent.</td>
<td>Variable depending on agent.</td>
<td>Exclude until rash has disappeared and fever is gone or until a physician diagnosis is obtained.</td>
</tr>
<tr>
<td>RINGWORM*</td>
<td>Range 4-10 days (Trunk or Limbs) 10-14 days (Face or Scalp).</td>
<td>As long as lesions are present.</td>
<td>Exclusion is not necessary unless the nature of contact with others could promote spread. Exclusion from swimming and contact sports is recommended until lesions cleared.</td>
</tr>
<tr>
<td>ROTAVIRUS</td>
<td>Usually 1-3 days.</td>
<td>During acute illness. Usually up to 8 days after onset but can be as long as 3 weeks.</td>
<td>Exclude children with diarrhea who use diapers or have toilet accidents. Toilet trained children with no accidents do not need to be excluded.</td>
</tr>
<tr>
<td>RUBELLA (German)</td>
<td>Range of 14-21 days; commonly 16-18 days.</td>
<td>From 1 week before to 1 week after onset of rash.</td>
<td>Exclude until 7 days after onset of rash.</td>
</tr>
<tr>
<td>SALMONELLA</td>
<td>Range 6-72 hours; commonly 12-36 hours.</td>
<td>During course of infection and until organism is no longer in feces (Usually several days to several weeks)</td>
<td>Exclude until symptoms have disappeared. Specific activity exclusion will be based on OCHD recommendations.</td>
</tr>
<tr>
<td>SCABIES*</td>
<td>First exposure 2-6 weeks; subsequent exp. 1-4 days.</td>
<td>Until mites and eggs are destroyed.</td>
<td>Exclude until 24 hours of treatment completed.</td>
</tr>
<tr>
<td>SCARLET FEVER AND STREP THROAT</td>
<td>Usually 1-3 days.</td>
<td>Communicability usually ends within 24 hours if treated, 10-21 days if untreated.</td>
<td>Exclude until under treatment for 24 hours.</td>
</tr>
<tr>
<td>SHIGELLA</td>
<td>Range of 12-96 hours; commonly 1-3 days,</td>
<td>During course of infection and until organism is no longer in feces, about 4 weeks after onset.</td>
<td>Exclude until symptoms have disappeared and appropriate stool cultures are negative.</td>
</tr>
<tr>
<td>SHINGLES (Herpes Zoster)</td>
<td>No incubation period - reactivation of dormant virus.</td>
<td>As long as 1 week after lesions appear.</td>
<td>No exclusion if lesions are kept covered and contained. Otherwise, exclude until all lesions have crusted.</td>
</tr>
</tbody>
</table>

Vaccine preventable disease, required school entry vaccine

* PLEASE NOTE: HAND, FOOT AND MOUTH DISEASE, CONJUNCTIVITIS (PINK EYE), IMPETIGO, MONO, PEDICULOSIS (HEAD LICE), RING WORM AND SCABIES NO LONGER NEED TO BE REPORTED UNLESS THERE ARE TWO (2) OR MORE CASES IN A WEEK.
How to Create/Activate your Oakland County Dashboard Account

Please follow all steps in these instructions to complete the verification of your account to obtain access to the Health and Human Services Communication Portal (HHSCP).

Open internet browser, ie: Google Chrome, Mozilla Firefox or Microsoft Edge

Enter https://myapps.oakgov.com into address bar in browser

To create an account, click on “Sign up” located after “Don’t have an account?” at bottom of page
Create Account – Enter your email address, Create a password, Enter First Name, Last Name, User Type, enter the word “School”, Organization – enter “Public”, “Charter”, “Early Learning” or “Non-Public”, Department – enter School name, enter School Phone number and Click on “Register”

You will be receiving an email from Okta '<noreply @okta.com> If you do not see this email in your inbox, please be sure to check your junk/spam/trash folders.

You must complete this verification within 7 days of receipt of the email.
See example email below – You must click on green button that says “Activate Account” before trying to Sign in.

Once you have activated your account, you will see the image below, click on “Got it”
To request access to the HHSCP, please click on “Add Apps” in upper right corner of screen

Look for the icon titled "HHSCP" with Oakland County logo, then click on “Request” as shown below.
When requesting access to the HHSCP, please be sure you have included the following information in the Comments Section as shown in the image below.

School’s Name
City where School is Located
Role Needed – (ie: School Liaison (Reports Weekly School Illness or School Safety Liaison (Reports School Drill Information).

After entering all information requested, please click on “Request App”
After requesting app, you will see message below. An email will be sent to you when your access has been approved.

Once access is approved, you will receive an email from OKTA that looks like email shown below.

The address to access the [HHSCP] is https://myapps.oakgov.com

Username – Your entire email address
Enter your Password

Please contact Kim Krumm at 248-858-8676 or krummk@oakgov.com if you have any questions or need additional information regarding the Health and Human Services Communication Portal.
Health Human Services Communication Portal (HHSCP)

The HHSCP is a tool used by all schools in Oakland County to report weekly school illnesses, school drills (fire, tornado & shelter) and hearing & vision scheduling.

*If you do not currently have an account in the HHSCP or you are having difficulty accessing the portal, please contact Kim Krumm at 248-858-8676 or krummk@oakgov.com

**IMPORTANT: You must activate your account before you will be able to access the portal. A Welcome email will be sent to you from OKTA, if you have not received this email, please check your spam/junk/trash folders. This email will include a link to activate your account and add HHSCP to your Oakland County Dashboard.**

LOGGING In
Open an Internet Browser (ex: Google Chrome, Microsoft Edge, Mozilla Firefox)
In the search or address bar, Type https://myapps.oakgov.com

ENTER Username – (Entire email address)
ENTER Password – if prompted
HOME PAGE

The screen below is the home page for the HHSCP. If you have never logged in to the new HHSCP, you may be prompted to “Sign in” by clicking on the arrow in the top right corner.

*Specific instructions for each role are included in the document below

Role: School Liaisons – Submit weekly school Illnesses
School Safety Liaisons – Submit school drills
SCHOOL LIAISONS
(Users who complete Weekly School Illness Reports)

Site will open to Current Scorecard Status

Select Weekly Report from Left Navigation menu, see image below

![Image of Health and Human Services Communication Portal]

Select your Reporting Period, see image below.

![Image of Weekly Report]

Complete your weekly Communicable Disease Report, example report shown below. You can enter numbers in the “Week Total” column or in the individual days (ex: Monday, Tuesday, etc), you can’t enter in both areas. There are boxes you can check for “No Cases to Report” and “No School in Session”

If a Reportable Disease needs to be submitted, click on “Add Reportable Disease” seen below weekly report. If not needed, click “Finalize” to submit your report.
Complete all fields shown below and click on “Save”

Additional “Reportable Illnesses” can continue to be added using the steps above. When finished click on “Finalize”. If you are finished reporting, you may close the application.
SCHOOL SAFETY LIAISONS
(Users who submit scheduled/actual Drill Dates)

Click on Search Sites as shown below

You can search sites by typing a Site Name or by selecting a site listed at bottom of page (Ex: Addams Elementary School)
Click on “Detail” at far right of screen, see below –

Click on “School Drills” at top of page and Select school year. See below image

Select “Add” located at far right of page
Select Drill type (Fire, Shelter or Tornado)

Select Date/Time for Drill, select date, then click on “clock picture” at bottom of calendar to choose a time. Click on “Add School Drill” and repeat until all drills are entered.
To update scheduled drills with “Actual Data”, click on Edit as shown below.

Select “Actual Date”, choose date/time, then click on “Update School Drill”
**NEW FEATURE**

Schools will now be able to upload their School Emergency Plans directly into the portal. Instructions to upload documents are found below -

To upload School Emergency Plan, click on “Documents” located in top menu

Click on “Add” at far right of screen
Click on “+Add Files”, navigate to folder where your “School Emergency Plan” is located. Click on “Start Upload”

If you have any questions, please feel free to contact Kim Krumm at 248-858-8676 or krummk@oakgov.com
